GTP Moto-G Valves Operations & Maintenance Manual

This "QUICK START" manual is supplied as a guideline for installation; please visit www.gtpcompany.com for complete instruction manual, assembly drawings and installation drawings.

| GENERAL INFORM | ATION | | | |
|----------------|--------------------|-----------------|-------------------|--------------|
| MODEL: | | | SERIAL: | |
| MATERIAL: | ☐ Brass ☐ PV | C ☐ 316SS | | |
| PORT SIZE: | □ 1/2" □ 3/4 | . " □ 1" | ☐ 1 1/2" | □ 2" |
| ACCESSORIES: | ☐ "PTC" Power To C | lose 🔲 "X" Powe | er To Close Posit | ioning Valve |
| | ☐ "WP" Weather Pro | of 230VAC | | |

- *** WARNING BEFORE YOU GET STARTED ***

 1) All fasteners & fittings should be inspected and secured before operation as they may be loosened in transit
- 2) Personnel safety practices should apply at all times
- 3) Safety glasses or face shields and gloves should be worn
- 4) Do not service alveol feed package without disconnecting power
- 5) Close isolation valve and release pressure before servicing any components on the system
- 6) All liquids in system should be drained before servicing
- **1.0 INTRODUCTION** Thank you for choosing General Treatment Products **"Moto-G"** Motorized Ball Valves. The motorized ball valve that thinks it's a solenoid. Just apply power for the minimum cycle to open and remove power and it closes by itself. Fail safe by design, these inexpensive valves could just be your piece of mind.
- **2.0 WARRANTY General Treatment Products "Moto-G" Valves** are guaranteed for one year from date of shipment against manufacturing defects in material and workmanship that develop in the service for which they are designed. We will repair or replace a defective part of this system when returned to our factory with freight prepaid; providing that the part is found to be defective upon inspection. We assume no liability for labor and/or other expenses in making repairs or adjustments.
- **3.0 UNPACKING Upon receipt of order, inspect package thoroughly**. In the event there was damage incurred in transit you must notify the freight company within 3-5 days of receipt of order. Once valve is inspected for damage and received in good condition, and store indoors until installing.
- **4.0 LOCATION AND ENVIROMENT** Although the enclosure is NEMA rated, valve and mounting hardware and power cord should not be exposed to direct elements. In most cases, there will not be a dry indoor location that is convenient to install the Moto-G valve. Some shelter, awning or shed needs to be installed to validate warranty.
- **5.0 INSTALLATION/OPERATION When installing any control valve, always plumb in an isolation valve for maintenance.** Moto-G valves come standard with a 30" power cord and may be mounted in any direction but should avoid mounting in a vertical line with flow headed down. Have only an experienced electrician hardwire valve. Wiring diagrams are provided in section 9.0.

Apart from the power to close valves, Moto-G valve operates simply by adding power, as the valve opens the capacitor begins stores energy. Once power is removed the stored energy from the capacitor will close the valve. Power cycles for the $\frac{1}{2}$ " to 1" valves need to be a minimum of 30 seconds and the 1 $\frac{1}{2}$ " to 2" valves need to be powered for a minimum of 60 seconds to be sure there is enough power to close. "CAUTION" Short power cycle(s) may cause the valve to stay open or not finish the close cycle.

"PTC" and "X" Valve must be hardwired and need power to close. See wiring details for further instructions.

6.0 PRESSURE AND TEMPERATURE LIMITATIONS: Moto-G Valves maximum operating perimeters are 150PSI @ 85F. Some optional fittings may change limitations, contact factory for assistance.

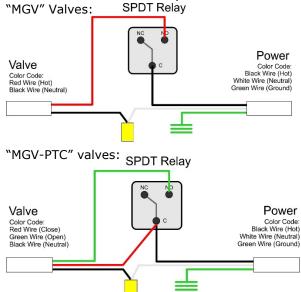

| MATERIAL | MAXIMUM SHORT-TERM TEMPERATURE | MAXIMUM OPERATING TEMPERATURE | MAXIMUM OPERATING PRESSURE |
|--------------------------------------|--------------------------------------|-------------------------------------|----------------------------------|
| Polyethylene (PE) | 160°F/69°C | 85°F/36°C | N/A |
| Polyvinylchloride (PVC) | 140°F/60°C | 85°F/36°C | 100PSI/6.9BAR |
| Chlorinated Polyvinylchloride (CPVC) | 180°F/77°C | 120°F/49°C | 100PSI/6.9BAR |
| Polypropylene (PP) | 180°F/77°C | 100°F/49°C | 100PSI/6.9BAR |
| Carbon Steel (CS) | 200°F/93°C | 200°F/93°C | 150PSI/10.3BAR |
| Cast Iron (CI) | 200°F/93°C | 200°F/93°C | 150PSI/10.3BAR |
| Brass (BR) | 200°F/93°C | 200°F/93°C | 150PSI/10.3BAR |
| Stainless Steel (SS) | 200°F/93°C | 200°F/93°C | 150PSI/10.3BAR |

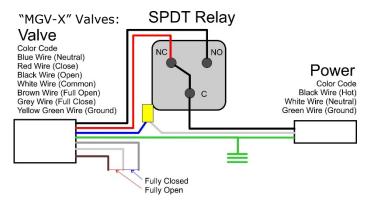

Note: Minimum Fluid Temperature is 50°F/10°C.

GTP Moto-G Valves Operations & Maintenance Manual

7.0 ROUTINE MAINTENANCE Routine maintenance in this section is referred to as checking a valve once a month until a maintenance schedule can be determined. All fasteners should be check for proper operations. Maintenance and care will depend upon the usage.

8.0 WIRING contact factory for details.

9.0 TROUBLE SHOOTING

| 5.0 INCODEL SHOOTING | | | | |
|--|--|--|--|--|
| Trouble | Action | | | |
| Valve will not close after Power is cycled | Check Control Settings; Besure that valve is | | | |
| | being power for a minimum of 30-60 seconds. Large | | | |
| | valves need 60 second minimum cycle time. | | | |
| | Testing; Plug valve into hot wall socket for 30 | | | |
| | seconds and remove power | | | |
| | Remove valve and clean | | | |
| Valve will not open or close | Check Wiring; See wiring examples above | | | |
| | Check Control Relay; Bypass controls by plugging | | | |
| | valve into hot wall socket | | | |

If you are having trouble, please visit www.qtpcompany.com or contact customer service.

Manufacturing: Bypass & Filter Feeders, Glycol Feed Packages, Separators & Separator Systems, Tanks, Tank Stands, Chemical Batch Mixers, Corrosion Coupon Racks, Packaged Feed Systems and Custom Systems
