“EASY-FIT” Hose Kits

Inspired by our customer requests, **General Treatment Products “EF” Easy-Fit EPDM Hose Kits** ensure the most convenient and versatile installation of your bypass feeder. “EF” Kits allows you to choose your inlet and outlet connections and even replace feeders (even other manufactures) without calling a plumber.

Simple by design, just attach the valve assembly and valve channel to an adjacent wall, run your hoses to the appropriate fitting and secure you feeder. Or, have the valve assembly installed before the feeder arrives!

GTP “EF” Hose Kits use Parker/Dayco GST II hose rated to 300 PSI and can handle from -40 to 212°F. This multi-textile spiral reinforce hose is battle tested and a perfect fit for most applications. Visit us our feeder page at www.gtpcompany.com for specification on this and all of our products.

DB2/HP with EFDB

Manufacturing: Glycol Feed Packages, Bypass Filter Feeders, Separators and Separator Systems, Bromine Feeders, Corrosion Coupon Racks, Chemical Mixers, Tanks and Tank Stands.
